### Education

software engineering

2021 - 2025

FPT University

### Skills

- **Automation Testing Tools:** Playwright, Selenium
- **API Testing:** Postman, Swagger, RESTful API automation, RestSharp
- **Programming Languages:** C#, JavaScript
- **Frameworks & Libraries:** NUnit, xUnit,
- **Database Testing:** SQL Server, PostgreSQL
- **Test Management & Defect Tracking:** Trello, Jira
- **Continuous Integration/Deployment:** CI/CD

### Objective

Full-stack Tester with 2+ years of experience in manual and automation testing for enterprise systems. Experienced with Selenium (C#), Playwright, API testing (Postman/Swagger), and SQL database validation. Proven experience working with US & Singapore clients in Agile environments at FPT Software. Seeking to deliver high-quality software and continuously enhance automation expertise.

### Work experience

**Fullstack Tester**

**3/2024 - Current**

**FPT SOFTWARE**

Participated in the C99 Program – a large-scale vehicle re-marketing platform for a US client. As a Fullstack Tester, responsible for testing both frontend and backend components, ensuring functionality, performance, and security. Tasks included designing and executing test cases, performing UI/UX testing, API testing, and database validation with SQL Server. Worked with tools such as Postman, Swagger, Selenium (C#), xUnit/NUnit. Collaborated closely with developers and BA teams to reproduce issues, verify bug fixes, and ensure data accuracy across all system layers.

### Honors & Awards

**Achieved good student all semester in FPT**    FPT Award

### Certifications

**2023**    Computer Communications

**2023**    Academic prepare english

**2023**    ToEIC 650+

### Activities

**Leader**

**2023 - 2023**

**FSAC(FPT SHIP AND CHARITY)**

My team consists of six members who coordinate and manage a network of shippers. We handle the organization of deliveries, oversee logistics, and generate profit from these operations. Instead of keeping the earnings, we collectively gather the profits and reinvest them into charitable activities. Our primary focus is supporting the homeless by donating the accumulated funds to provide them with essential resources, food, shelter, and other necessities to improve their quality of life.

pipelines

- **Authentication & Security:** JWT
- **Design Pattern:** Singleton, Factory, POM

## Interests

- Listening to music
- Traveling and exploring new cultures

## Projects

Fullstack Tester

03/2024 - Current

### C99 Program – FPT Software (US Client)

**Number of participants:** 1,000+ engineers globally

Using Selenium C#, Xunit, Postman, Rally

Participated in a **strategic, large-scale software development project** for a major US client under FPT Software's FHM division.

Collaborated with **cross-functional teams across multiple countries**, contributing to **automation testing using Selenium (C#), Xunit, and Postman**.

Involved in **functional testing, integration testing, and regression testing**, ensuring **high-quality deliverables for critical systems**.

Worked in an **Agile environment**, adhering to strict client requirements and global software standards.

Gained experience in **managing large-scale projects with complex workflows and multi-platform integration**.

Fullstack Tester

2024 - 2025

### Cursor E-Learning Platform (Singapore Client)

Online learning platform with course management, video streaming, payments, and user enrollment.

Team size: 25+ members.

Performed **manual & automation testing** (UI/UX, Functional, Integration, Regression, E2E).

Built API automation for course, payment, and user services.

**Developed automation framework using Playwright (JavaScript/TypeScript) + POM.**

**Validated backend data with SQL queries.**

Fullstack Tester

2024 - 2025

### LMS System (Internal FPT)

Internal Learning Management System for employee training, courses, assessments, and progress tracking.

Team size: 30+ members.

Designed **test plans** and **executed manual testing**.

Performed **API testing** and **database** validation.

Built & maintained automation scripts using **Selenium (C#) + NUnit/xUnit** and **Playwright**.

**Supported UAT** and release activities.

Fullstack Tester

2024 - 2025

### Fusion (Multi-Enterprise IT Project Platform)

**Production:** <https://www.fusion.info.vn/>

Multi-enterprise platform for IT project management, maintenance, incidents, and resources.

Team size: 6 members.

Executed cross-system testing (**frontend, backend, database**).

Performed service-level API testing with **Postman/Swagger**.

Enhanced automation suites using **Selenium (C#) & Playwright** with **POM**.

Ensured data consistency via **SQL Server validation**.
